- Menampilkan beranda menu dan perhitungannya

Pada tampilan ini menampilkan daftar menu, harga dan banyaknya pesannya. Kemudian jika ti klik hitung maka akan tampil total belanjanya.

Untuk menampilkan daftar menu, harga dan total belanjanya berikut source codenya.

The screenshot shows an IDE window with a tab labeled 'masuk'. The code is in Java and defines a class 'masuk' that extends 'javax.swing.JFrame'. The class has a constructor 'masuk()' and two private methods: 'DAGINGActionPerformed()' and 'SAYURActionPerformed()'. The constructor sets the window state to 'MAXIMIZED_BOTH', sets 'setUndecorated' to 'true', and calls 'initComponents()'. The 'DAGINGActionPerformed()' method checks if 'DAGING.isSelected()' is true; if so, it sets 'JmlDaging.setText("")'. Otherwise, it sets 'JmlDaging.setEditable(false)'. The 'SAYURActionPerformed()' method checks if 'SAYUR.isSelected()' is true and sets 'JmlSayur.setText("")'. There is a 'Generated Code' section between the constructor and the first private method. The IDE interface includes a 'Source' tab, a toolbar with various icons, and a status bar at the bottom showing 'Start Page'.

```
14 public class masuk extends javax.swing.JFrame {
15
16     /**
17      * Creates new form masuk
18      */
19     public masuk() {
20         this.setExtendedState(JFrame.MAXIMIZED_BOTH);
21         this.setUndecorated(true);
22         initComponents();
23     }
24
25     /**
